

2022

City of Wahoo West Hackberry Area Study

JEO Consulting Group, Inc.

Introduction

Purpose of the Study

This West Hackberry Area blight and substandard study of the designated study area is intended to give the Community Development Agency and City Council the basis for considering the existence of blight and substandard conditions within the delineated study area. Through this process, the City of Wahoo's Community Development Agency may employ and exercise the power authorized in Nebraska Community Development Law to eliminate and prevent blighted and substandard conditions that are detrimental to the future public health, safety, morals, and general welfare of the entire community as well as the surrounding region. If the City of Wahoo finds and determines, based on substantial evidence in the record before it, that the recommended Blight and Substandard Area (detailed below and referred to herein as "West Hackberry Area Blight Study Area") meets the statutory conditions for an area that is blighted, substandard, and in need of redevelopment, the designated study area will become a Redevelopment Area under the Community Development Law (Neb. Rev. Stat. §§ 18-2101 to 18-2155).

This blight and substandard study examines existing conditions of land use, buildings, and structures within the designated study area in the City of Wahoo to determine its eligibility for redevelopment activities. Potential opportunities for redevelopment exist throughout the designated study area, which would allow the City of Wahoo to overcome blighted and substandard conditions and avoid issues that could lead to blight and substandard conditions. When evaluating blight and substandard conditions, the City of Wahoo must adhere to Nebraska Community Development Law.

Nebraska Revised State Statutes

The Community Development Law provides guidelines under which municipalities may address concerns and develop strategies for the rehabilitation and redevelopment of deteriorating area, as well as the prevention and elimination of substandard and blighted area. The Legislature has declared, in pertinent part:

It is hereby found and declared that there exist in cities of all classes and villages of this state area which have deteriorated and become substandard and blighted because of the unsafe, insanitary, inadequate, or overcrowded condition of the dwellings therein, or because of inadequate planning of the area, or excessive land coverage by the buildings thereon, or the lack of proper light and air and open space, or because of the defective design and arrangement of the buildings thereon, or faulty street or lot layout, or congested traffic conditions, or economically or socially undesirable land uses...These conditions are beyond remedy and control solely by regulatory process in the exercise of the police power and cannot be dealt with effectively by the ordinary operations of private enterprise without the aids herein provided...It is further found and declared that the prevention and elimination of blight is a matter of state policy, public interest, and statewide concern and within the powers and authority inhering in and reserved to the state, in order that the state and its municipalities shall not continue to be endangered by area which are focal centers of disease, promote juvenile delinquency, and consume an excessive proportion of their revenue. §18-2102

Consistent with these findings, municipalities have been granted the power to address deterioration, substandard conditions, and blight through any number of means, including “the formulation of a workable program, the approval of community redevelopment plans consistent with the general plan for the development of the city, the exercise of its zoning powers, the enforcement of other laws, codes, and regulations, relating to the use of land and the use and occupancy of buildings and improvements, the disposition of any property acquired, and the providing of necessary public improvements.” Neb. Rev. Stat. §18-2104.

Nebraska Revised Statute §18-2104 enables a municipality to declare that blight and substandard conditions exist. The statute reads,

The governing body of a city, to the greatest extent it deems to be feasible in carrying out the provisions, shall afford maximum opportunity, consistent with sound needs of the city, to the rehabilitation or redevelopment of the community redevelopment area by private enterprises. The governing body of a city shall give consideration to this objective in exercising its powers, including the formulation of a workable program, the approval of community redevelopment plans consistent with the general plan for the development of the city, the exercise of its zoning powers, the enforcement of other laws, codes, and regulations relating to the use and occupancy of buildings and improvements, the disposition of any property acquired, and providing of necessary public improvements.

The process of improving an area begins with the creation of a municipality-wide workable program for utilizing appropriate private and public resources to address the specific conditions to be improved. Such workable programs may include “provision for the prevention of the spread of blight into area of the municipality which are free from blight through diligent enforcement of housing, zoning, and occupancy controls and standards; the rehabilitation or conservation of substandard and blighted area or portions thereof by re-planning, removing congestion, providing parks, playgrounds, and other public improvements by encouraging voluntary rehabilitation and by compelling the repair and rehabilitation of deteriorated or deteriorating structures; and the clearance and redevelopment of substandard and blighted area or portions thereof.” Neb. Rev. Stat. §18-2105.

The statutes provide a means for the governing body of a municipality to address and develop strategies for rehabilitation and redevelopment of the community. Nebraska Revised Statute §18-2105 also grants authority to the governing body to formulate a redevelopment program. The statute reads,

The governing body of a city or an authority at its direction for the purposes of the Community Development Law may formulate for the entire municipality a workable program for utilizing appropriate private and public resources to eliminate or prevent the development or spread of urban blight, to encourage needed urban rehabilitation, to provide for the redevelopment of substandard and blighted area, or to undertake such of the aforesaid activities or other feasible municipal activities as may be suitably employed to achieve the objectives of such workable program. Such workable program may include, without limitation, provision for the prevention of the spread of blight into area of the municipality which are free from blight through diligent enforcement of housing, zoning and occupancy controls and standards; the rehabilitation or conservation of substandard or blighted area or portions thereof by replanning, removing congestion, providing parks, playgrounds, and other public improvements by encouraging voluntary rehabilitation and by compelling the repair and rehabilitation of deteriorated or deteriorating structures; and the clearance and redevelopment of substandard and blighted area or portions thereof. §18-2105

. Prior to the adoption of a redevelopment plan, a municipality must have an adopted comprehensive plan (§18-2110) and shall have declared the redevelopment area to be a substandard and blighted area in need of redevelopment (§18-2109).

The important community development terms are defined in Nebraska Revised Statute §18-2103, several of which are shown below (organization and emphasis added):

Substandard area means an area in which there is a predominance of buildings or improvements, whether nonresidential or residential in character, which, by reason of dilapidation, deterioration, age or obsolescence, inadequate provision for ventilation, light, air, sanitation, or open spaces, high density of population and overcrowding, or the existence of conditions which endanger life or property by fire and other causes, or any combination of such factors, is conducive to ill health, transmission of disease, infant mortality, juvenile delinquency, and crime, (which cannot be remedied through construction of prisons), and is detrimental to the public health, safety, morals, or welfare;

Blighted area means an area, which

(a) by reason of the presence of a substantial number of deteriorated or deteriorating structures, existence of defective or inadequate street layout, faulty lot layout in relation to size, adequacy, accessibility, or usefulness, insanitary or unsafe conditions, deterioration of site or other improvements, diversity of ownership, tax or special assessment delinquency exceeding the fair value of the land, defective or unusual conditions of title, improper subdivision or obsolete platting, or the existence of conditions which endanger life or property by fire and other causes, or any combination of such factors, substantially impairs or arrests the sound growth of the community, retards the provision of housing accommodations, or constitutes an economic or social liability and is detrimental to the public health, safety, morals, or welfare in its present condition and use; and,

(b) in which there is at least one of the following conditions:

- (i) Unemployment in the designated area is at least one hundred twenty percent of the state or national average;
- (ii) the average age of the residential or commercial units in the area is at least forty years;

- (iii) more than half of the plotted and subdivided property in an area is unimproved land that has been within the city for forty years and has remained unimproved during that time;*
- (iv) the per capita income of the area is lower than the average per capita income of the city or village in which the area is designated; or*
- (v) the area has had either stable or decreasing population based on the last two decennial censuses.*

In no event shall a city of the metropolitan, primary, or first class designate more than thirty-five percent of the city as blighted, a city of the second class shall not designate an area larger than fifty percent of the city as blighted, and a village shall not designate an area larger than one hundred percent of the village as blighted;

Substandard and Blight Eligibility Analysis

Designated Study Area

The designated study area is property partially within and partially adjacent to the corporate limits for evaluation pursuant to the Community Development Law. The designated study area was selected for a number of reasons, including:

1. The presence of blighted and substandard characteristics within the study area.
2. The potential for private development and redevelopment activities within the study area.
3. The need for improvements in infrastructure due to specific existing conditions.
4. The economical and functional obsolescence of certain properties within the study area.
5. The need for public intervention to stimulate the development and redevelopment of vital infrastructure systems and housing to support these private redevelopment efforts.

Once declared substandard and blighted, the City of Wahoo can stimulate and manage future development in this area by creation and use of the redevelopment plan and its statutory authority to provide financial incentives for private development.

Through the redevelopment process, the City of Wahoo can guide future development in the community and provide financial incentives for development. The use of the Nebraska Community Redevelopment Law by the City of Wahoo is intended to improve the community and enhance the quality of life for all residents by eliminating conditions that contribute to the spread of blight and hinder private reinvestment in the area due to these factors. Using the Nebraska Community Development Law, Wahoo can eliminate negative factors and implement programs and/or projects identified to improve conditions, thereby removing, or preventing blight and substandard conditions.

Substandard and Blight Conditions

As set forth in section 18-2103(31), **substandard area** shall mean an area in which there is a predominance of buildings or improvements, whether nonresidential or residential in character, which by reason of the following:

1. **Dilapidation/deterioration***
Exterior inspection of buildings to note deficiencies (sound, minor, major, dilapidated)
 - Examples include structural (walls, foundation, roof), building systems (gutters, roof surface, chimney), and architectural systems (fire escapes, weatherization, steps, exterior paint, site conditions).
2. **Age or obsolescence**
Estimate age of structures (40+ years criteria)
3. **Inadequate provision for ventilation, light, air, sanitation, or open spaces**
Overall sight conditions
 - Examples include junked cars or debris, cluttered alleyways, antiquated infrastructure systems (overhead power lines), outdoor storage/sanitation facilities, unpaved parking/outdoor storage.
4. **Other substandard conditions**
 - (a) High density of population and overcrowding (census); or
 - (b) The existence of conditions which endanger life or property by fire and other causes as unsanitary and unsafe conditions which endanger life or property by fire and other natural causes floodplain; or
 - (c) Any combination of such factors is conducive to ill health, transmission of disease, infant mortality, juvenile delinquency, and crime; is detrimental to the public health, safety, morals, or welfare (includes sanitation concerns,

inadequate infrastructure systems (sewer, water service mains, storm sewers), poor lighting, crime statistics, floodplain area, outdoor storage, site clutter).

As set forth in the Community Development Law, a **blighted area** shall mean an area, which by reason of the presence of:

1. **A substantial number of deteriorated or deteriorating structures***
Exterior inspection of buildings to note deficiencies (sound, minor, major, dilapidated)
 - Examples include structural (walls, foundation, roof), building systems (gutters, roof surface, chimney), and architectural systems (fire escapes, weatherization, steps, exterior paint, site conditions).
2. **Existence of defective or inadequate street layout**
Condition of streets/inadequate access including sidewalks
 - Examples include street conditions, dead ends, railroad crossings, linear downtown, narrow alleyways, blind crossings, and sidewalk condition.
3. **Faulty lot layout in relation to size, adequacy, accessibility, or usefulness**
Conditions associated with accessibility/usefulness of the lots
 - Examples include land locked parcels, odd shaped lots, undersized lots, lots with accessibility concerns.
4. **Unsanitary or unsafe conditions**
Conditions which pose a threat to public health and safety
 - Examples include age and physical condition of structures, floodplain, lack of public infrastructure systems, unsanitary conditions, ventilation concerns.
5. **Deterioration of site or other improvements**
Field observation of age and condition of public utilities, debris, and inadequate public improvements
 - Examples include lack of off-street parking, storm drainage, junk cars, dilapidated structures, debris, on-site storage, congested overhead power lines.
6. **Diversity of ownership**
The total number of unduplicated owners
 - Examples include the necessity of to acquire numerous lots is a hindrance to redevelopment. However, land assemblage of larger proportions necessary for major developments, is more economically feasible and will attract financial support, as well as public patronage required to repay such financial support. Such assemblage is difficult without public intervention.
7. **Tax or special assessment delinquency exceeding the fair value of the land**
Examination of public records to determine the status of taxation of properties
 - Examples include delinquent taxes, real estate taxes or special assessments exceeding the fair market value.
8. **Defective or unusual conditions of title**
Examine public records to determine any defective or unusual title defects
 - Examples include improper filings, liens, defective titles, etc.
9. **Improper subdivision or obsolete platting**
Examine public records to determine improper subdivision and obsolete platting
 - Examples include undersized lots, improper zoning, lot configuration, easement concerns, never recorded vacated streets, accessibility concerns.

10. The existence of conditions which endanger life or property by fire or other causesExamine conditions which endanger life or property

- Examples include inadequate, undersized, or inoperative public infrastructure systems, floodplain, building materials, site access, on-site storage (cars), secluded area for pests and vermin to thrive, inadequate surface drainage, street/sidewalk conditions, etc.

11. Any combination of such factors, substantially impairs or arrests the sound growth of the community, hinders the provision of housing accommodations, or constitutes an economic or social liabilityEconomic and/or socially undesirable land uses

- Examples include incompatible land uses, economic obsolescence, functional obsolescence which relates to the property's ability to compete in the marketplace.

12. Is detrimental to the public health, safety, morals, or welfare in its present condition and use; and in which there is at least one of the following conditions:

- (a) Unemployment in the designated blighted area is at least one hundred twenty percent of the state or national average (Census statistics);
- (b) The average age of the residential or commercial units in the area is at least 40 years (Public Records);
- (c) More than half of the plotted and subdivided property in the area is unimproved land that has been within the city for 40 years and has remained unimproved during that time (Public records);
- (d) The per capita income of the designated blighted area is lower than the average per capita income of the city or village in which the area is designated (Census); or
- (e) The area has had either stable or decreasing population based on the last two decennial censuses (Census).

*Where structural conditions are evaluated, individual structures are rated in accordance with the following rating schedule as defined by the U.S. Department of Housing and Urban Development: no problem, adequate condition, deteriorating condition, or dilapidated condition. The following descriptions define the rating schedule used to assess and evaluate building and structure conditions:

No Problem

No structural or aesthetic problems are visible.

Adequate Condition

- Slight damage to porches, steps, roofs, etc. is present on the structure,
- Slight wearing away of mortar between bricks, stones, or concrete blocks,
- Small cracks in walls or chimneys,
- Cracked windows,
- Lack of paint, and
- Slight wear on steps, doors, and door and window frames.

Deteriorating Condition

- Holes, open cracks, rotted, loose, or missing materials in parts of the foundation, walls, (up to one-quarter of the wall), or roof (up to one-quarter of roof),
- Shaky, broken, or missing steps or railings,
- Numerous missing and cracked windowpanes,
- Some rotted or loose windows or doors (no longer wind- or water-proof),
- Missing bricks or other masonry of chimney, and
- Makeshift (un-insulated) chimney.

Dilapidated Condition

- Holes, open cracks, or rotted, loose or missing material (siding, shingles, brick, concrete, tiles, plaster, floorboards) over large area of foundation, on walls or on roof,
- Substantial sagging of roof, floors, or walls,
- Extensive damage by fire, flood, or storm, and
- Inadequate original construction such as makeshift walls, roofs made of scrap materials, foundations or floors lacking, or converted barns, sheds, and other structures not adequate for housing.

Designated Study Area

The study area as identified can be found in Figure 1. For this study, the study area will be known as the “Designated Study Area” which was reviewed for substandard and blight characteristics.

Figure 1: Designated Study Area

City of Wahoo, NE

West Hackberry Blight Study: Study Area

Recommended Blight and Substandard Area

Based upon the review of the designated study area, and its context with the community, JEO Consulting Group recommends the designated study area be recommended as a Blight and Substandard Area. This area consists of approximately 50.0 acres. The following legal description delineates the Recommended Area

A PARCEL OF LAND LOCATED IN THE NORTHWEST QUARTER OF SECTION 4, TOWNSHIP 14 NORTH, RANGE 7 EAST OF THE SIXTH P.M., SAUNDERS COUNTY, NEBRASKA BEING DESCRIBED AS FOLLOWS: BEGINNING AT THE SOUTHWEST CORNER OF LOT 1, DRY RUN SUBDIVISION; THENCE EAST ON THE SOUTH LINE OF SAID LOT 1, A DISTANCE OF 250 FEET, MORE OR LESS, TO THE SOUTHEAST CORNER OF SAID LOT 1; THENCE NORTH ON THE EAST LINE OF SAID LOT 1 AND ITS NORTHERLY EXTENSION, A DISTANCE OF 440 FEET, MORE OR LESS, TO THE NORTH LINE OF THE SOUTHWEST QUARTER OF SAID SECTION 4; THENCE EAST ON SAID NORTH LINE, A DISTANCE OF 670 FEET, MORE OR LESS, TO THE CENTERLINE OF VACATED WILLOW STREET; THENCE SOUTHERLY ON SAID CENTERLINE, A DISTANCE OF 985 FEET, MORE OR LESS, OT THE NORTH LINE OF 12TH STREET; THENCE EAST ON THE NORTH LINE OF 12TH STREET, A DISTANCE OF 230 FEET, MORE OR LESS TO A POINT OF INTERSECTION WITH THE NORTHERLY EXTENSION OF THE EAST LINE OF WILLOW CREEK SUBDIVISION; THENCE SOUTH ON SAID NORTHERLY EXTENSION, A DISTANCE OF 66 FEET, MORE OR LESS, TO THE NORTHEAST CORNER OF WILLOW CREEK SUBDIVISION; THENCE WEST ON THE NORTH LINE OF WILLOW CREEK SUBDIVISION, A DISTANCE OF 200 FEET, MORE OR LESS, TO THE NORTHWEST CORNER OF WILLOW CREEK SUBDIVISION; THENCE SOUTH ON THE WEST LINE OF WILLOW CREEK SUBDIVISION, A DISTANCE OF 562 FEET, MORE OR LESS, TO THE SOUTHWEST CORNER OF WILLOW CREEK SUBDIVISION; THENCE EAST ON THE SOUTH LINE OF WILLOW CREEK SUBDIVISION, A DISTANCE OF 200 FEET, MORE OR LESS, TO THE SOUTHEAST CORNER OF WILLOW CREEK SUBDIVISION; THENCE SOUTHERLY, A DISTANCE OF 70 FEET MORE OR LESS TO A POINT ON THE SOUTH LINE OF 10TH STREET BEING 300 FEET WEST OF THE EAST LINE OF SAID NORTHWEST QUARTER; THENCE SOUTH ON THE WEST LINE OF THE EAST 300 FEET OF SAID NORTHWEST QUARTER, A DISTANCE OF 648 FEET, MORE OR LESS, OT THE SOUTH LINE OF SAID NORTHWEST QUARTER; THENCE WEST ON SAID SOUTH LINE, A DISTANCE OF 1128 FEET, MORE OR LESS, TO THE EASTERLY RIGHT OF WAY LINE OF U.S. HIGHWAY 77; THENCE NORTHERLY ON SAID EASTERLY RIGHT OF WAY LINE, A DISTANCE OF 1870 FEET, MORE OR LESS, TO THE POINT OF BEGINNING.

Findings and Contributing Factors

The intent of this study is to determine whether the West Hackberry Area Blight Study Area within the community has experienced structural and site deterioration or if there are other negative factors which are decreasing the development potential for the area. The field survey conducted on Friday, July 29, 2022, indicated the study area has such deterioration or lack of municipal infrastructure, thus the study area warrants further examination regarding blighted and substandard conditions. The following factors were evaluated to determine if there is a reasonable presence of blight and substandard conditions within the West Hackberry Area Blight Study Area.

This section reviews the building and structure conditions, infrastructure, site conditions and land use found within the West Hackberry Area Blight Study Area based upon the statutory definitions, the planning team's observations during the field survey, and explains the identified contributing factors. *Appendix A* provides a visual description and documents examples of the different conditions that led to each factor's determination. See *Appendix A* for a visual description of the site conditions, debris, condition of public infrastructure, deteriorating structures and other observed conditions within the West Hackberry Area Blight Study Area.

BLIGHTED CRITERIA CONDITIONS

As set forth in the Nebraska legislation, a **blighted area** shall mean an area, which by reason of the presence of:

Substantial Number of Deteriorated or Deteriorating Structures

Each parcel within the West Hackberry Area Blight Study Area was examined for the structural conditions. A total of 3 structure were evaluated and all 3 or 100% of the structures within the designated study area were graded as deteriorating or dilapidated This is considered a significant contributing factor.

Defective or Inadequate Street Layout

Street Conditions and Accessibility

Street conditions and accessibility within the West Hackberry Area Blight Study Area were evaluated in relation to the provision of safe and efficient public circulation and access, and with regard to ease of travel and appearance. The noted deficiencies are: missing portions or incomplete streets; restricted access to parcels due to NDOT controls and the lack of the sidewalks in the area. The transportation infrastructure conditions are illustrated on Figure 2.

Overall, the West Hackberry Area Blight Study Area has limited connectivity with the adjacent street grid due to the open drainage channel and incomplete streets. Due to the lack of connectivity and sidewalks, this is considered a contributing factor.

Faulty lot layout in relation to size, adequacy, accessibility, or usefulness

Throughout the West Hackberry Area Blight Study Area, the lot sizes and shapes vary. Some lots are too large and need additional subdivision and one lacks access. In addition, a portion of the area lacks public infrastructure improvements for accessibility, utilities and usefulness. Overall, this factor is considered to be contributing to the recommended blight designation.

Unsanitary or unsafe conditions

Conditions which pose a threat to public health and safety

Debris

Debris piles or tire piles were noted in the field analysis in 7 locations. This can contribute to fire hazards or harboring rodents and vermin as well as pose a potential mosquito breeding area to spread disease.

Sidewalks

The study area lacks sidewalks that safely allow for pedestrian movement through the site or connecting to adjacent uses.

Floodplain

A substantial portion of the area is with a designated 100 year or 500-year floodplain.

Dilapidated Structures

The dilapidated structures can pose a risk to people in the from fire, harboring vermin and rodents, and structural failure.

Open drainage Channel

The area is bisected by a large open channel for storm drainage. During storm events, the unprotected area could pose a safety hazard to people in the vicinity.

As a result, this factor is considered to be contributing the recommended blight designation.

Figure 2: Transportation Conditions

City of Wahoo, NE

West Hackberry Blight Study: Transportation

Deterioration of site or other improvements

Sidewalks

The lack of sidewalks, including accessible crosswalks, inhibits pedestrian movement through the study area.

Vehicle circulation and parking

The lack of connectivity of paved streets, a land locked lot, and non-paved parking surface can impede travel to or from the study area. Deteriorated surface parking and drive areas were observed throughout the study area.

As a result, this factor is considered to be contributing the recommended blight designation.

Diversity of ownership

The diversity of ownership was not evident in the West Hackberry Area Blight Study Area. There are two unique private property owners in the West Hackberry Area Blight Study Area. Thus, this is not considered a contributing factor.

Improper subdivision or obsolete platting

Obsolete platting

Throughout the West Hackberry Area Blight Study Area, the lot sizes and shapes vary. Some lots are too large and need additional subdivision; while some are odd shaped or have limited use due to acute angles and or narrowness.

As a result, this factor is considered to be contributing the recommended blight designation.

The existence of conditions which endanger life or property

Conditions which pose a threat to public health and safety

Age of Structures

Structures constructed prior to 1978 may contain lead-based paint which can pose health and human development risks to children with chipping or peeling.

Debris

Debris piles or tire piles were noted in the field analysis in seven locations. This can contribute to harboring rodents and vermin as well as pose a potential mosquito breeding area to spread disease.

Sidewalks

The study area lacks sidewalks that safely allow for pedestrian movement through the site or connecting to adjacent uses.

Floodplain

A substantial portion of the area is with a designated 100 year or 500-year floodplain.

Dilapidated Structures

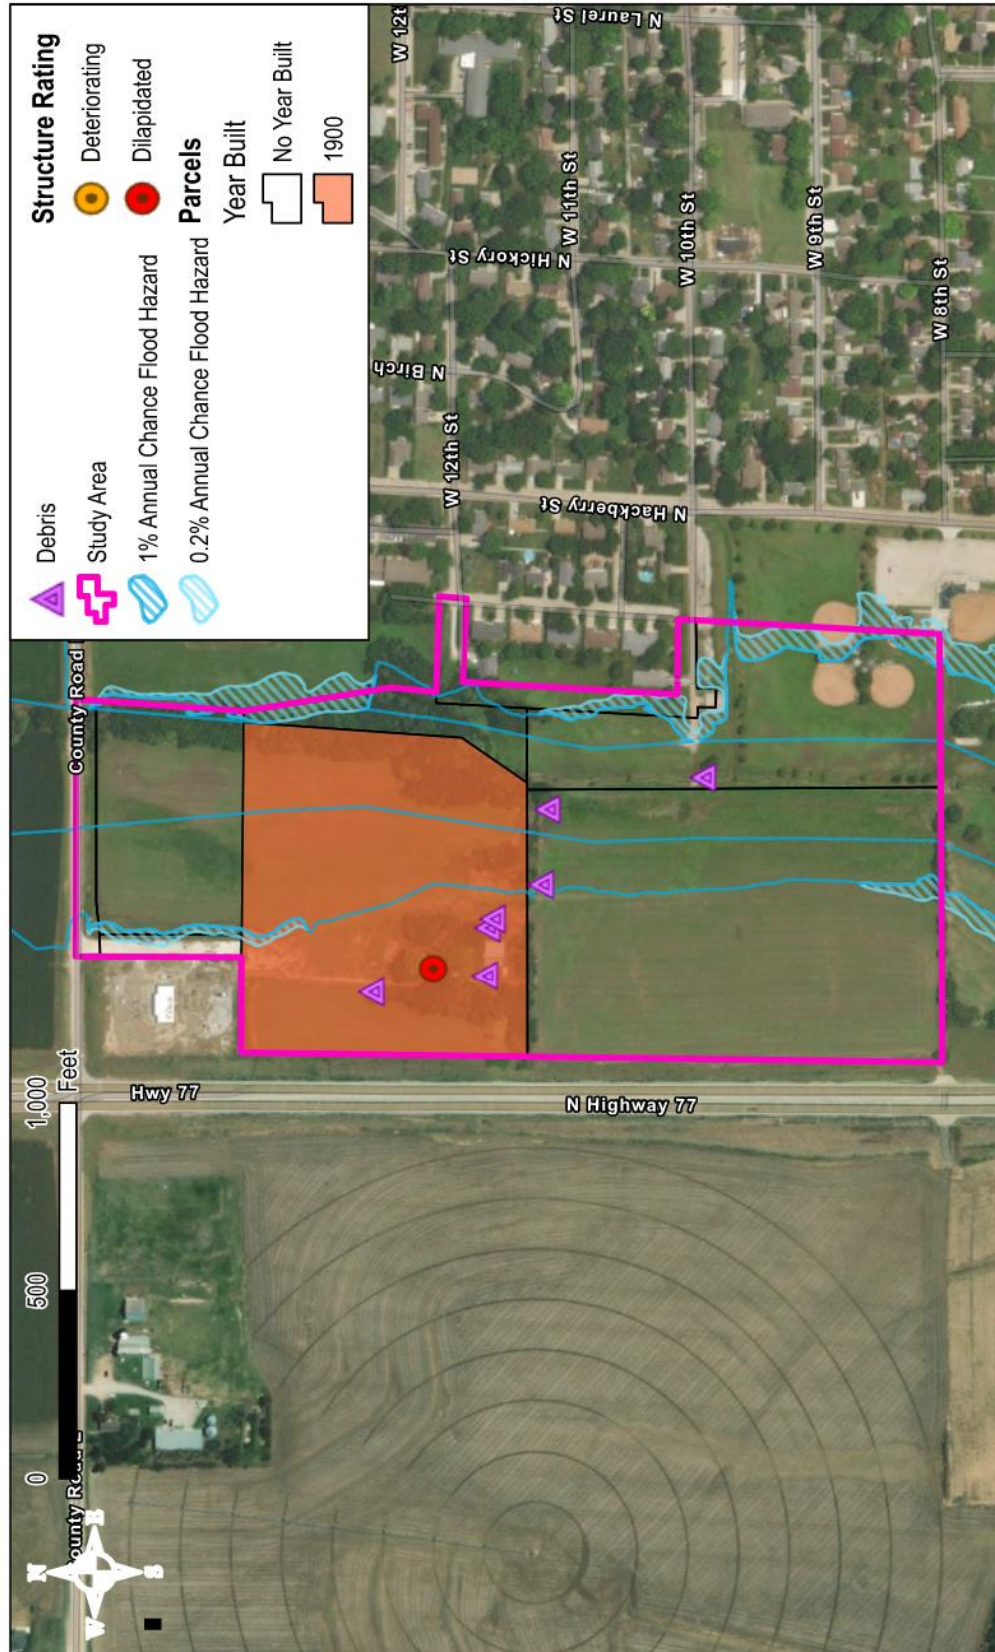

The dilapidated structures can pose a risk to people in the from fire, harboring vermin and rodents, and structural failure.

Open drainage Channel

The area is bisected by a large open channel for storm drainage. During storm events, the unprotected area could pose a safety hazard to people in the vicinity.

As a result, this factor is considered to be contributing the recommended blight designation.

City of Wahoo, NE

West Hackberry Blight Study: Potential Hazards

Any combination of such factors that substantially impairs or arrests the sound growth of the community, retards the provision of housing accommodations, or constitutes an economic or social liability.

Minor conditions or factors were observed in the field analysis that could impair sound growth of the community.

As a result, it is not considered a substantial contributor to the West Hackberry Area Blight Study Area to be considered blighted.

Is detrimental to the public health, safety, morals, or welfare in its present condition and use; and in which there is at least one of the following conditions:

The average age of the residential structures in the area is at least 40 years. The average age of the residential structures is 122 years (1900).

SUBSTANDARD CRITERIA

A **substandard area** shall mean an area in which there is a predominance of buildings or improvements, whether nonresidential or residential in character, which by reason of the following:

Dilapidation/deterioration

As part of the Blight and Substandard Study, a Structural Conditions Survey was completed along with an analysis of the land-use patterns in the West Hackberry Area Blight Study Area.

A total of 3 or 100% of the structures within the designated study area were graded as deteriorating within the study area. This is considered a significant contributing factor.

Age or obsolescence

Information regarding the age of the permanent structures within the West Hackberry Area Blight Study Area was provided by the Saunders County Assessor's Office.

The average age of the residential structures is 122 years, therefore, this is considered a contributing substandard factor.

Inadequate provision for ventilation, light, air, sanitation, or open spaces

Poor Drainage and Sanitation

The West Hackberry Area Blight Study Area contains areas of trash and debris. However, this is not considered significant to be considered a contributing factor.

Other Substandard Conditions

The existence of conditions which endanger life or property

Age of Structures

Structures constructed prior to 1978 may contain lead-based paint which can pose health and human development risks to children with chipping or peeling.

Debris

Debris piles or tire piles were noted in the field analysis in seven locations. This can contribute to fire hazards, the harboring rodents and vermin as well as pose a potential mosquito breeding area to spread disease.

Sidewalks

The study area lacks sidewalks that safely allow for pedestrian movement through the site or connecting to adjacent uses.

Floodplain

A substantial portion of the area is with a designated 100 year or 500-year floodplain.

Open drainage Channel

The area is bisected by a large open channel for storm drainage. During storm events, the unprotected area could pose a safety hazard to people in the vicinity. As a result, this factor is considered to be contributing the recommended blight designation.

JEO CONSULTING GROUP

Blighted and Substandard Findings

The West Hackberry Area Blight Study Area has many items contributing to the blight and substandard conditions. Based on the information collected and analyzed pursuant to Nebraska Revised Statutes, the area has various items that were considered beyond the remedy and control of the normal regulatory process of the City of Wahoo or impossible to reverse through the ordinary operations of private enterprise. These conditions include:

Table 1: Summary Matrix

Criteria	
Structure condition	Yes
Street layout	Yes
Faulty lot layout	Yes
Unsanitary or unsafe conditions	Yes
Deterioration of site	Yes
Diversity of owners	No
Tax special assessment	No
Titles conditions	No
Obsolete platting	Yes
Endanger life/property	Yes
Any combination	No
Age of Structure	Yes
BLIGHT TOTALS	8/12
Exterior inspection of structures	Yes
Age of structures	Yes
Inadequate provision for ventilation, sanitation	No
Other Substandard – (conducive to ill health, floodplain, endanger life)	Yes
SUBSTANDARD TOTALS	3/4
TOTALS	11/16

Conclusion

Several conditions within the West Hackberry Area were observed during the field survey which warrant a designation as blighted and substandard. The conditions showing evidence of blight are interspersed throughout the West Hackberry Area Blight Study Area, and as such, parcels within the boundaries of the West Hackberry Area Blight Study Area are recommended for further action.

It is the professional opinion of the consultant, based on the information collected and analyzed pursuant to Nebraska Revised Statutes, that the West Hackberry Area Blight Study Area contains the required conditions that would warrant a designation as blighted and substandard by the City of Wahoo and the Community Redevelopment Authority. The City of Wahoo should review this Blight and Substandard Study, and if satisfied with the findings contained in this study, may, by resolution, designate the West Hackberry Area Blight Study Area as “Blighted and Substandard” as provided for in the Community Development Law.
